Skills

- Java
- Fundamental C and Python
- Data Structures
- Django
- MERN Stack
- Database Management

Projects

Banking and Finance, July-December 2022

This project is a part of our college SDP-1 project. We opted for Django as our backend and ended up acquiring valuable insights into web development, especially given that this is my first project in this field.

Food and Hospitality, January-May 2023

This project is a key part of our college's SDP-2 effort. We decided to use the versatile MERN stack for

Internships

Social Internship at Swecha, June 2022

We aim to provide underprivileged government school students with academic resources to overcome barriers to academic success. We have also developed an animated website about the bell ring to facilitate their learning. **Virtual Internship,AICTE,may-july 2023**

completed internship in Juniper Networking and cloud conducted by AICTE on January 15, 2023.
